

XM satellite radio provides a variety and quality that is not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what you are permitted to hear. Respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming. I also have and use a Cadillac with Weather information via the radio or onstar. It is not as easy to get weather information in that car as it is in the one that I own that has XM radio, nor is the voice as clear on the Cadillac as it is on the XM radio.
